North Carolina 1998 Agricultural Statistics

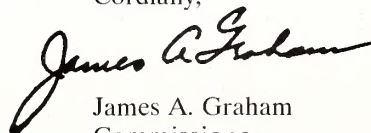

Office of
THE COMMISSIONER OF AGRICULTURE
Raleigh, North Carolina

There was a time when North Carolina farmers lived off the food they grew and sold extra produce at roadside stands or door-to-door for added income. Back then produce raised in the state most likely stayed in the state. Today's farmers routinely ship products across the nation and overseas competing in a global market. The North Carolina Department of Agriculture and Consumer Services actively promotes North Carolina products at local, national and international markets to help our farmers survive and thrive in today's economy. In just the last 10 years, cash receipts from North Carolina products have doubled, making it imperative we keep expanding our marketing base. Along with expanding markets we must continue to use new technology to improve agricultural production while keeping costs down and protecting our environment. Agriculture is North Carolina's number one industry, remaining the bedrock of our state's economy throughout the years due to the agricultural community's progressive attitude toward embracing new technology, improving efficiency and diversifying production. All Divisions in the North Carolina Department of Agriculture and Consumer Services reflect this attitude and are dedicated to improving agriculture, providing necessary services and protecting the natural resources of the state.

The 1998 North Carolina Agricultural Statistics bulletin is just one example of the many services provided by the Department. The information in this publication is collected from farmers and agribusinesses throughout the state who willingly and voluntarily take their time to tell agriculture's story. I thank them for their commitment to agriculture and this program. Without these statistics it would be difficult to measure our accomplishments and even tougher to envision our future. I would also like to extend my sincere appreciation to the Agricultural Statistics staff for their dedicated work and especially the enumerators who work so close with the farming community.

Cordially,

James A. Graham
Commissioner

Sweetpotatoes Number One in North Carolina

Traditionally, sweetpotatoes are enjoyed alongside the Thanksgiving and Christmas turkey in most American households. Whether baked with marshmallows or creamed with brown sugar, a holiday meal would simply not be complete without this sweet, rich vegetable. So why not have sweetpotatoes more often?

Sweetpotatoes have been called “nature’s health food” because they are rich in vitamins and minerals. Sweetpotatoes contain twice the daily recommended allowance of Vitamin A, 1/3 the daily requirement of Vitamin C, are high in Vitamin B-6, iron, potassium and fiber. Plus, since they are naturally fat and cholesterol free, they are a great addition to a healthy diet.

The sweetpotato is a native crop to the Coastal Plains of North Carolina. In fact, American Indians were growing sweetpotatoes when Columbus discovered America in 1492. The sweetpotato is also native to the New World Tropics of Peru, Ecuador, Central and South American countries dating as far back as 750 B.C. Some scientists even believe that dinosaurs may have enjoyed this delicious vegetable. By the 16th century explorers had carried sweetpotatoes to Africa, India, Southeast Asia, Indonesia, Guam and the Philippines. Soon people all over the world were enjoying the sweet vegetable. Shakespeare even made reference to sweetpotatoes in *The Merry Wives of Windsor* and *Troilus and Cressida*.

Today, North Carolina leads the nation in sweetpotato production, growing approximately 32,000 acres and making up nearly 40 percent of the total U.S. production. As a root crop, sweetpotatoes grow best in the sandy soil and temperate climate of the coastal plains. Johnston, Nash and Wilson are the top three North Carolina counties in terms of sweetpotato production.

Sweetpotatoes are grown from May through October, but they are available year round. The harvest begins in late August and continues through early November. Some sweetpotatoes are immediately washed and graded for sale. These are called the “green crop.” Other crops are cured and stored until they are needed. “Cured” means the skin on the potatoes has tightened, the starches have turned to sugar, and the abrasions have healed. Compared to green stock, cured sweetpotatoes are sweeter and more resistant to skinning. Sweetpotatoes can be bought fresh, frozen, dehydrated or individually pressure wrapped.

There are many different types of sweetpotatoes available. Texture, color, moisture and sweetness vary in each individual sweetpotato. The Beauregard, Carolina Rose, Carolina Ruby, NC Porto Rico 198, Hernandez and the Jewel are the types that can be found growing in North Carolina.

The field cover photos were taken at Burch Farms in Faison, North Carolina. Burch Farms has been family owned and operated since 1950 and is a major North Carolina sweetpotato shipper. Burch Farms, as well as many other growers across the state are supported and promoted through the North Carolina SweetPotato Commission. Sweetpotato recipes, brochures, posters and other materials are available through the North Carolina SweetPotato Commission as well as the North Carolina Department of Agriculture and Consumer Services. Or visit the sweetpotato web site at: <http://www.agr.state.nc.us/markets/commodit/hortical/sweetpot/>

Statistical Reports Program

NORTH CAROLINA AGRICULTURAL STATISTICS brings together the current and historic statistics concerning agriculture in the State. Where possible, information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service rendered to farmers and others in the State by the National Agricultural Statistics Service of the U.S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture and Consumer Services.

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. Thus, in 1919 the N.C. Department of

Agriculture entered into a cooperative agreement with the U.S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture and Consumer Services

The North Carolina Agricultural Statistics Division publishes official statistics on crops, livestock, prices, and various other agricultural items. A list of the most important reports and the approximate dates of release is shown in the table below. The reports marked with an (*) are issued separately. All others are included in the semi-monthly release entitled "Farm Report". The reports are free for respondents providing information used to compile the reports. Others are charged a nominal fee for the reports, which are available by writing to: State Statistician, P.O. Box 27767, Raleigh, NC 27611 or E-mail at: agstat@MAIL.agr.state.nc.us

TYPE OF REPORTS	FREQUENCY OF REPORT	APPROXIMATE DATE AVAILABLE
CROP REPORTS <ul style="list-style-type: none"> • Intentions to plant • Production of Field Crops, Fruits & Vegetables • Grain Stocks (All Positions) • Annual Crop Summaries - Small Grains • Other Field Crops 	Annually Monthly (In Season) Quarterly Annually Annually	March 30 9-12th Jan. 10, End of Mar., June, Sept. ¹ Final sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operator's share of income from the sector's production activities. ² Includes machine hire and custom work, forest products sold, other farm income, and gross imported rental value of farm buildings. ³ A positive value of inventory change represents current-year production not sold by December 1. A negative value is an offset to production from prior years included in current-year sales. ⁴ Includes repair and maintenance of capital items, machine hire and custom work, marketing, storage, and transportation expenses, contract labor, and miscellaneous expenses.

North Carolina 1997 Annual Weather and Climate Summary

The year began with temperatures well above normal and rainfall below average. Although precipitation was below normal, rainfall was enough to slow field preparation. This weather pattern continued through January. February started cold and dry but warmed near the end of the month with enough rainfall to prevent fieldwork. These conditions were favorable for small grains.

Localized freezing gave fruit growers a scare in mid-March, but freeze protection equipment prevented serious damage. At months end some areas of the state were still hampered by surplus soil moisture, but the warm weather allowed farmers to prepare fields for spring plantings. April came and went with cooler temperatures and rainfall near normal. The unseasonably cold weather throughout the entire month caused light frost damage to fruit and vegetable crops in the mountain regions.

May was cool but a busy month nonetheless. Below normal rainfall allowed farmers to get into the field and make significant planting progress. Virtually all the corn, cotton, peanuts and tobacco were planted by the end of May and soybean plantings were near the five year average. Small grain harvest and hay cuttings were in full swing by the end of May. Farmers finished most crop plantings by the end of June. Weather conditions were mostly cool throughout June, but precipitation was scarce as soil moisture levels dwindled.

Severe weather hit several areas of the state the first week of July, but storms were localized and crop damage was minimal. For the most part, conditions were typical for the entire month with weekly average temperatures near normal. However, some regions were becoming

very dry. The month was punctuated by the remnants of Hurricane Danny causing some damage to crops in it's path, but overall the rainfall was encouraging to growers. The rains at the end of July became important as August turned hot and was one of the driest months on record. Widely scattered showers popped up as low pressure systems collided with the high pressure dome that covered North Carolina and most of the southeast. However, any precipitation was localized and field crops began to show signs of reduced yield potential around mid-August and only got worse as the hot dry weather stretched to month's end.

By the time September rolled around, there were forecasts of major yield reductions due to the dry weather. However, rains came around the middle of the month, and late season crops responded in kind. October remained uneventful until the last week when significant rainfall moved across the state. Cotton along with newly planted small grains benefited from the precipitation. Moreover, much of the state experienced it's first killing frost.

November saw steady rainfalls that slowed harvest progress and small grain plantings. Cotton, soybean, sorghum and sweetpotatoes harvest lagged due to wet fields. Below average temperatures throughout the month were observed and killing frosts hit the Old Belt as the tobacco markets were drawing to a close. Wet weather and mixed temperatures carried North Carolina through the end of the year. However, by the middle of December very little acreage was left to be harvested, and most of the small grains were seeded and beginning to emerge.

HARVEST PROGRESS, NORTH CAROLINA

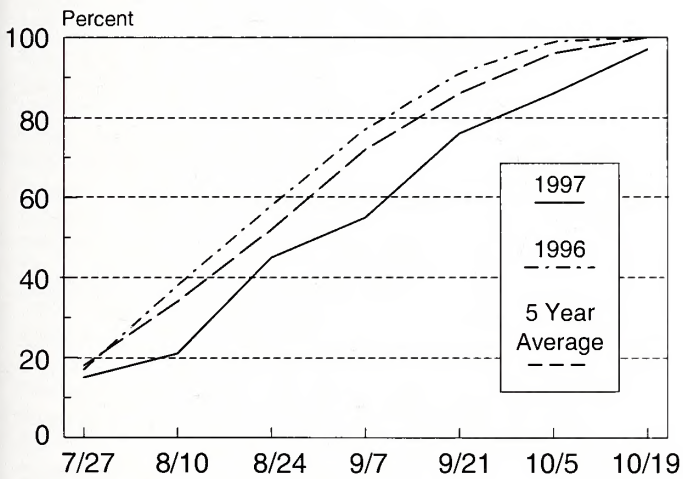

Soybean Harvest

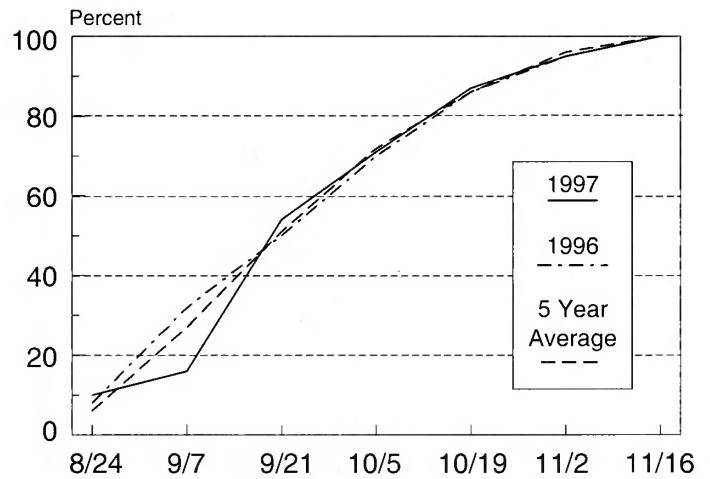

Cotton Harvest

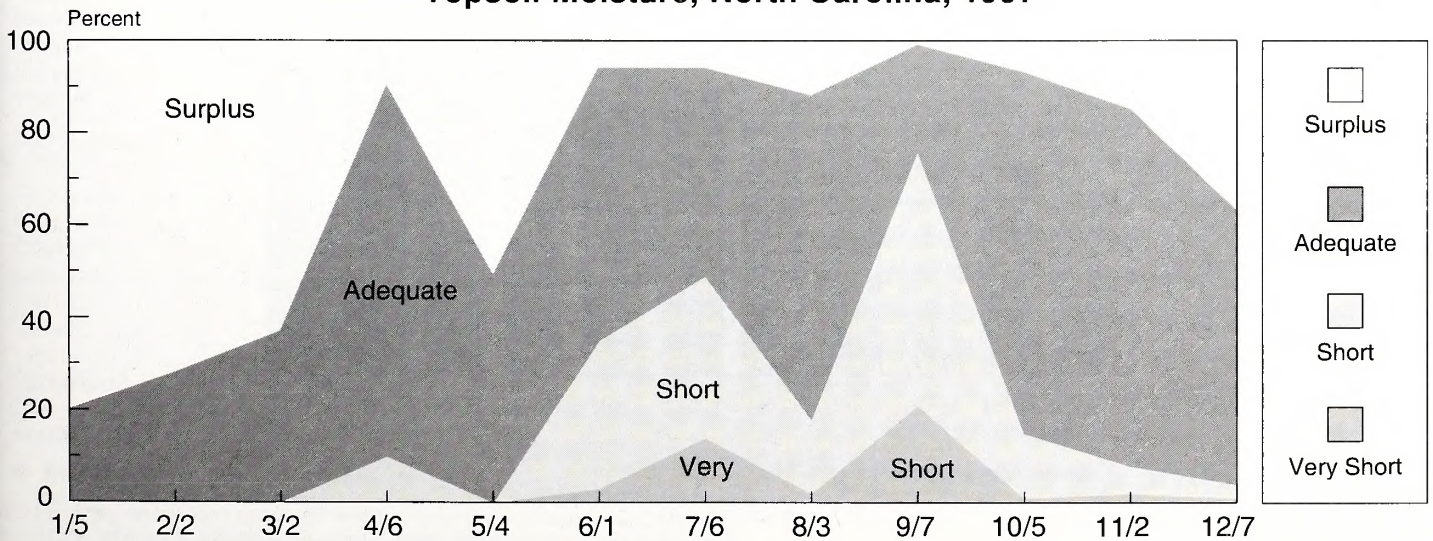

Flue-cured Tobacco Harvest

Corn Harvest

Topsoil Moisture, North Carolina, 1997

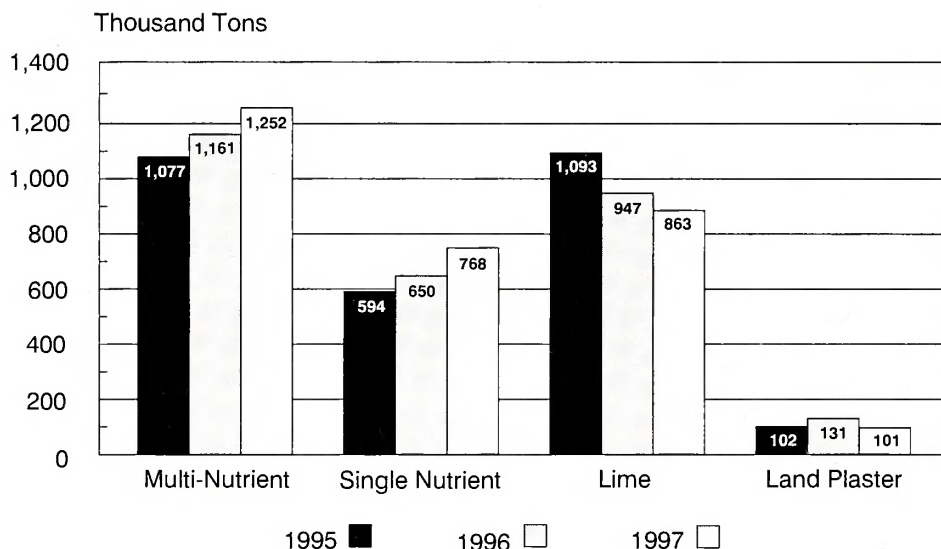

Total Fertilizer Tonnage Up

The total amount of fertilizer, including lime and land plaster, shipped in North Carolina rose 3% from last year to 2.98 million tons. Multiple and single nutrient tonnage increased in 1997 while both lime and land plaster decreased. Multiple nutrient tonnage increased

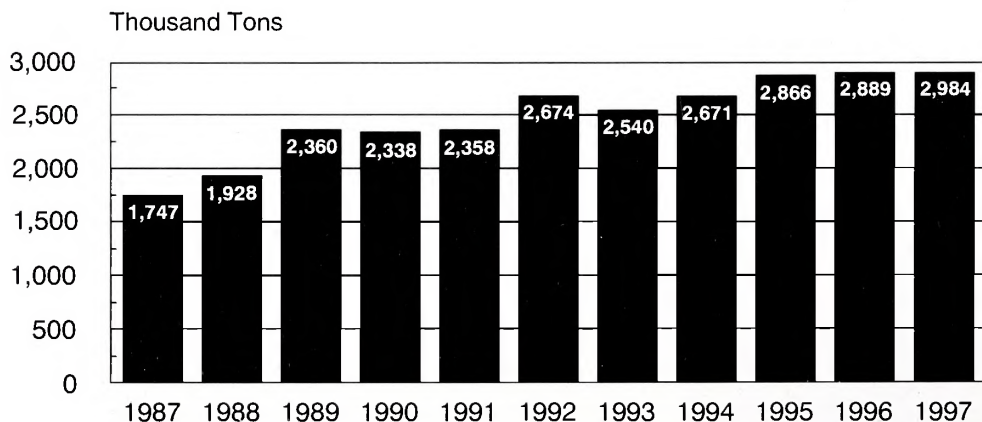

8% from 1.16 to 1.25 million tons. Single nutrient tonnage rose 18% to 767,657 tons. Lime tonnage in 1997 decreased 9% from 947,126 to 863,225 tons. Land plaster shipments, at 100,752 tons, decreased 23% from last year.

Fertilizer Tonnage Shipped ¹ North Carolina, 1995-97

¹ Tonnage shipments begin July 1 previous year through June 30.

Total Fertilizer Shipped ^{1 2} North Carolina, 1987-97

¹ Total fertilizer shipped includes lime and land plaster.

² Total tonnage shipped July 1 through June 30.

¹ Some counties not shown separately to avoid disclosing individual operations. ² Includes total income from farm and commercial forestry as estimated by County Extension Agents. The portion from commercial forestry is not included in cash farm receipts from farm marketings. ³ This estimate includes both commercial farm ponds and marine seafood. Trout and catfish income from commercial farm ponds was estimated by County Extension Agents. The income from seafood was based on dockside value of the commercial catch at the point of landing, as estimated by National Marine Fishery Service, U.S. Department of Commerce, Beaufort, N.C. Counties may not sum to equal district totals to avoid disclosing individual operations. * 1997 Data not available at time of publication.

1997 North Carolina Crops Summary

Flue-cured Tobacco Yield Near Record

Flue-cured tobacco yield averaged 2,324 pounds per acre in 1997 and was the second highest yield on record. Harvested area, at 309,000 acres, represent a 10% increase over 1996. Subsequently, the additional acres and high yield translated into a 25% increase in flue-cured tobacco production totaling 718.1 million pounds. The value of the flue-cured crop totaled \$1.2 billion, up 17% from 1996.

Burley tobacco producers harvested 8,400 acres in 1997, an 8% increase from 1996. The burley tobacco yield, at 1,585 pounds, was down 80 pounds as extremely dry weather affected the crop. Still, with the increase in acres, production increased 3% to 13.3 million pounds. Value of the crop was placed at \$24.8 million compared to \$24.9 million in 1996.

Cotton Production Declines

The State's cotton crop totaled 930,000 bales in 1997, down 7% from last year but the second highest since the record production in 1926. Area harvested totaled 665,000 acres, 6% below 1996. The yield per acre averaged 671 pounds, 6 pounds less than the previous year's average. The value of the crop was \$299 million, 14% below 1996. Cottonseed production totaled 321,000 tons in 1997, 6% lower than the previous year. Value of production was \$37 million and averaged \$114.00 per ton.

Corn Output Decreases

The production of corn for grain in 1997 totaled 77.4 million bushels, 9% below 1996. Tar Heel farmers harvested 870,000 acres with an average yield of 89 bushels per acre. This compares with 900,000 acres harvested in 1996 which yielded 95 bushels per acre. The value of the crop totaled \$228 million, down 22% from the previous year's crop.

Soybean Production Up

Soybean yield held steady from a year ago at 29 bushels per acre. Harvested area totaled 1.33 million acres, 130,000 acres above the previous year. Production totaled 38.6 million bushels, up 11% from 1996. The value of production was placed at \$258 million, 5% more than last year.

Peanut Acres, Yield and Production Down

Peanut growers produced a total of 329.1 million pounds in 1997, down 10% from 1996. Peanut growers could never recover from the extremely dry weather conditions that plagued them throughout the growing season. The State peanut yield, at 2,720 pounds, was down 220 pounds from 1996. Growers harvested 121,000 acres, 4,000 fewer than a year ago. The value of the 1997 crop was \$87.9 million, 13% less than the 1996 crop.

Record Wheat Production and Yield

Wheat production in North Carolina, at 34.8 million bushels, set a record in 1997 and was up a dramatic 34% from 1996. The statewide yield of 52 bushels per acre was also a record and up 8 bushels per acre from the previous year. Total acres harvested, at 670,000, were up 14% from 1996. The value of the crop totaled \$111 million, 2% below a year earlier.

Sweetpotato Yield Record High

North Carolina sweetpotato production in 1997 totaled 496 million pounds, up 14% from 1996. Harvested area, at 31,000 acres, was the same as 1996. The average yield per acre was a record 16,000 pounds, up 2,000 pounds from a year ago and up 500 pounds from the previous record set in 1994.

Potato Crop Improves

The production of Irish potatoes in North Carolina increased 2% in 1997 to 342 million pounds. Accompanying this increase in production was an increase in yield of 1,000 pounds to 19,300 pounds per acre. Harvested acres were down 500 to 17,700. Value of production, at \$22.6 million, was down slightly from the 1996 crop.

Weather Hurts Fruit Production

A late spring freeze led to apple growers suffering one of their worst years ever in 1997. Commercial utilized production of apples in 1997 was 150 million pounds, down 25% from 1996. This is the second lowest production level ever for apple growers. Only the 1986 crop was lower at 120 million pounds. A short crop and low juice prices contributed to the decrease in total value of production to \$16 million, 31% lower than 1996.

A late spring freeze and residual damage from the 1996 hurricanes also contributed to a reduction in production of blueberries in 1997. Growers produced 8.6 million pounds of blueberries in 1997, a 22% drop from 1996. The 1997 crop was valued at \$10.1 million.

The peach crop suffered from a Spring freeze in 1997 for the second year in a row. Peach production in 1997, at 10 million pounds, was about five times larger than 1996, but was 69% lower than 1995. Acres of bearing age trees totaled 1,600 in 1997 compared with 1,700 in 1996. The crop is valued at \$3.5 million, or one-half the 1995 crop value.

Vegetable Production Mixed

North Carolina production of processed cucumbers totaled 72,000 tons, 20% more than the 1996 production. The value of the crop, placed at \$16.2 million, was \$2.4 million more than 1996. Fresh market cucumber production totaled 72 million pounds, up 31% from a year earlier. Value of production totaled \$7.2 million for both years. All cabbage production totaled 170 million pounds, 35% more than 1996. The value of the crop is placed at \$14.5 million. Strawberry farmers produced 18 million pounds of strawberries, up 11% from the previous year. The value of the crop is estimated at \$12.6 million compared to \$10.9 million a year ago. Snap bean production was estimated at 29.3 million pounds, 10.7 million pounds above last year. The value of production is \$7.3 million. Producers harvested 143 million pounds of watermelons, a 2% decrease from a year ago. The value of the crop, set at \$7.8 million, compares to \$6.5 million in 1996. Tomato growers produced 60 million pounds of tomatoes, 33% more than 1996. The value of the crop is estimated at \$14.7 million. Sweet corn production, at 71.5 million pounds, is valued at \$9.7 million compared to \$8.5 million in 1996. Bell pepper production is estimated at 84 million pounds, up 28% from 1996. An increase in yield of 33% was responsible for the production increase. The crop is valued at \$21 million, 52% more than last year's.

Christmas Tree Inventory 34.2 Million, 1996 Sales Total \$78 Million

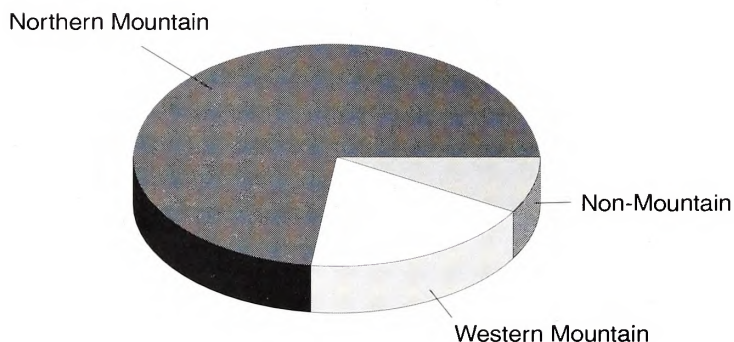

North Carolina's Christmas tree inventory in 1996 is estimated at 34.2 million trees on 23,530 acres. Ashe county led the state with 9.8 million trees on 6,500 acres, followed by Avery with 7.9 million trees on 5,100 acres and Alleghany with 6.5 million trees on 4,500 acres.

Of the estimated 1,600 Christmas tree growers, two-thirds have operations with less than 10 acres of trees, averaging 3 acres of trees per operation. The 60 largest growers, operations having 100 or more acres, account for 51 percent of the Christmas tree inventory. The average Christmas tree operation in North Carolina has 15 acres of trees with 1,452 trees on each acre.

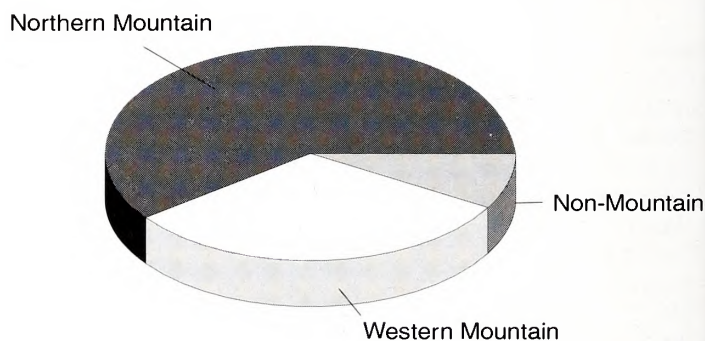

The 1996 cash receipts from Christmas Trees totaled \$78 million for North Carolina. Tree sales were valued at \$72 million with wreaths, roping, and greenery valued at \$6.0 million. The top 5 counties in sales were Ashe, Avery, Alleghany, Watauga and Jackson. These 5 counties accounted for 88 percent of North Carolina tree sales in 1996.

Expectations for the 1997 cutting season showed growers planning to sell 7 percent more trees than in 1996. A survey being conducted in 1998 will measure actual 1997 sales and tree inventory by height groups.

Floriculture Sales Exceed \$108 Million

The total wholesale value of all floriculture crops for North Carolina producers with \$10,000 or more in sales is estimated at \$108.1 million for 1997. A total of 270 growers reported 15.5 million square feet of covered area and 475 acres of outdoor production. Growers with sales of \$100,000 or more of selected floriculture crops had sales totaling \$101 million in 1997, up 13% from 1996. The text and table below are based upon 115 growers with \$100,000 or more in sales.

Bedding/Garden Plants accounted for \$51.5 million of the overall sales, up 13% from 1996. Value of flats of bedding plants increased 12% to \$23.4 million. Potted bedding plant sales increased 10% in 1997, totaling \$15.7 million.

Potted Flowering Plants accounted for \$38.2 million of the total wholesale value, up 8% from last year.

Poinsettias led this category with \$13.9 million generated from 4.5 million pots of all sizes. Potted chrysanthemums were up 33% in 1997 with an equivalent wholesale value of \$7.6 million from 2.3 million pots. Finished florist azaleas, Easter lilies, and Kalanchoes generated \$4.9 million in sales, while the remaining \$11.8 million came from all other flowering plants.

Foliage Hanging Baskets and Potted Foliage had an equivalent wholesale value of \$8.4 million, up 22% from the previous year. The value of foliage hanging baskets increased 9% to \$4.9 million. The net value of sales for potted foliage was \$3.5 million, up 47% from last year's sales of \$2.4 million.

Cut Flower sales, at \$3.0 million, increased 58% from 1996 sales of \$1.9 million.

Cash Receipts Continue Up

Cash receipts from all livestock, dairy, and poultry products continued its upward trend and totaled \$4.7 billion, up 6% from 1996. Hogs led the charge again this year with an increase of \$264 million or 15% to \$2.0 billion. Broilers rose 5% to 1.4 billion, while turkeys had a 14% decrease of \$84 million. Receipts from milk were down 12% to \$187 million, and eggs dropped \$15 million, down 7% from 1996. Cattle and calves increased 42% to \$219 million. Catfish and trout sales dropped 13% to \$8.4 million. Sheep and lambs advanced 12%, and honey sales went up 1%.

Hogs continue to be the number one commodity in the state with 24.3% of total sales, followed by broilers at 16.5%.

Hogs Inventory - Income Higher

Hog and pig inventory in North Carolina totaled 9.8 million head in December 1997, up 5% from the previous year. The December inventory was down 3% from the all time high inventory of 10.1 million head on September 1, 1997. Pork production for the year climbed to a new record high 3.8 billion pounds, exceeding last year's record by 11%. Cash receipts rose 15% to a new record high \$2.02 billion in 1997. Hogs are the number one commodity in the state, followed by broilers and tobacco. A crop of 18.1 million pigs was produced in the state during the year, another record high, and 12% above the 16.2 million in 1996. The average litter size was 8.88 pigs, compared with 8.75 in 1996.

Hog marketings for the year increased 18% from 1996 to 16.7 million head. The average price for hogs rose 30 cents to \$53.10 per cwt. The value of home consumption was down 1% to \$3.1 million. The estimated 5,800 hog operations in the state during 1997, were down 200 farms, 3% fewer than 1996.

New Record Highs for Broilers

Broiler income reached a new record high \$1.4 billion in 1997, up 5% from last year's record. Production increased 3% to 3.7 billion pounds, a new record high for North Carolina. Price per pound reached a record high 37.5 cents per pound in 1997, up .5 cent from last year.

North Carolina is ranked fourth in the nation for broiler production with a total of 665 million birds, down 2% from 1996.

Turkeys Number One

North Carolina retains the number one ranking for turkey production in 1997 with a total of 1.4 billion pounds produced, down 7% from the previous year. The number of turkeys raised was 53.5 million in 1997, down 10% from last year. Turkey price per pound decreased 3 cents to 39 cents allowing cash receipts to fall to \$528 million, 14% below last year's record high \$612 million.

Egg Receipts Down

The value of egg production in North Carolina decreased 7% in 1997 to \$203 million. Price per dozen stayed the same as the previous year at 87.5 cents. The number of eggs produced declined 7% to 2.8 billion. The state ranks ninth nationally in the value of egg production.

Milk Receipts Lower

During 1997, cash receipts from marketing of milk and cream produced in, North Carolina, fell 12% from 1996 to \$187 million. The value of milk produced dropped a comparable 12% to \$190 million.

Output per cow rose 4% to 16,566 pounds in 1997. Milk production fell 2% in 1997 to 1.26 billion pounds compared with 1.29 billion pounds in 1996. The net result is that producer's returns averaged, \$15.10 per hundredweight, down 10% from 1996. The average number of milk cows on farms, at 76,000 head, declined 5,000 from 1996.

Cattle and Calf Marketing Increase

Cattle and calf marketings increased 14% to 285,000 head, and 269,000 respectively in 1997. Calf births dropped 4% to 500,000 head. Inventory of cattle and calves in North Carolina as of January 1, 1998 at 1.09 million head was down 8% from the previous year.

Cash receipts from cattle and calves totaled \$219 million, up 42% from 1996. More marketings and higher prices account for the increase in cash receipts. Cattle and calf prices per cwt. at \$50.70 and \$72.80 increased 12% and 51% respectively. The value of home consumption increased 16% in 1997 to \$8.6 million.

Trout Sales Down

North Carolina's commercial trout growers sold a total of 4.7 million pounds of trout (foodsize, stockers, and fingerlings) during the 12 month period of September 1, 1996 to August 31, 1997. Trout sales were valued at \$6.2 million, down 13% from the previous year. The state ranks second in the nation in trout sales.

Foodsize value of sales increased 7% to \$5.3 million and averaged \$1.20 per pound, 4 cents above the previous year. Sales to processors accounted for 69% of foodsize sales with 15% going to restaurants and retail outlets, another 10% going to live haulers, 3% to other producers, 2% to fee and recreational fishing, and 1% directly to consumers. Trout losses totaled 315,000 pounds for the year with 63% lost to disease, 15% to droughts, and the balance to predators, chemicals, flood, and theft.

Catfish Sales Down

The 53 commercial catfish growers in North Carolina had sales of \$2.2 million in 1997, down 11% from the \$2.5 million the previous year. The water surface area used for the 1997 catfish production totaled 1,300 acres, down 100 acres from the previous year. Ninety six percent of foodsize catfish sales went to processors with the remainder going to consumers, retail and other producers. The average price received for foodsize catfish in North Carolina was 75 cents per pound, down 4 cents from the previous year's average, but 4 cents above the national average. North Carolina producers received slightly more per pound for their fish than the producers in the leading producing states of Mississippi, Alabama, and Arkansas.

Sheep Prices Record High

North Carolina sheep and lamb prices at \$36.20 and \$93.00 per cwt., rose to record highs in 1997 up 10% and 9% respectively from 1996. Sheep and lamb cash receipts increased 12% in 1997, rising to \$562,000. The increase in cash receipts was due to higher prices. Marketings for sheep and lambs increased 30% from 1996's to 766,000 pounds.

Sheep and lamb inventory dropped 17% to 11,000 head as of January 1, 1998. The 1997 lamb crop dropped 9% to 9,500 head.

The North Carolina Department of Agriculture and Consumer Services publishes annual county statistics for selected crops, livestock, poultry, dairy, and cash receipts. Census of Agriculture statistics are compiled by the United States Department of Commerce and are published every five years. Starting with the 1997 census, data will be published by the Department of Agriculture. Entries designated with an asterisk (*) were not published if there were fewer than 50 harvested acres of a specific crop, 500 hogs, 200 beef or milk cows, 500 total cattle, 200,000 broilers, 300,000 turkeys, or 5,000 chickens in a county. Some counties were not published to avoid disclosing individual operations.
